<p>CENTRAL SUPPLIER DATABASE MAAA:</p>	
<p>TAX COMPLIANCE STATUS (TSC) PIN:</p>	
<p>DESCRIPTION OF SERVICE</p>	<p>1. PURPOSE</p> <p>To appoint an experienced and competent service provider for the vulnerability assessment of the new Municipal ERP system.</p> <p>2. BACKGROUND</p> <p>The Municipal ERP system serves as the backbone for managing various administrative, financial, and operational functions within the municipality. Given the criticality of the system, it is imperative to ensure its security against potential vulnerabilities. A vulnerability assessment is a systematic approach to identifying weaknesses in the system's infrastructure, configurations, and applications. By conducting such an assessment, the municipality can proactively mitigate risks, safeguard sensitive data, and uphold the integrity of its operations.</p> <p>3. DISCUSSION</p> <p>The decision to request a vulnerability assessment for the Municipal ERP system stems from the recognition of the evolving threat landscape and the need to fortify defences against cyber-attacks. With the increasing frequency and sophistication of cyber threats targeting government entities, investing in proactive measures becomes paramount. A vulnerability assessment will provide insights into existing vulnerabilities, potential entry points for malicious actors, and areas requiring immediate attention. Moreover, it aligns with best practices in cybersecurity governance, compliance requirements, and risk management principles.</p> <p>Furthermore, a vulnerability assessment enables the Municipality to identify areas that require immediate attention and remediation efforts. By pinpointing these weaknesses proactively, we can take pre-emptive actions to mitigate risks before they materialize into security breaches or operational disruptions.</p>

4. SCOPE OF WORK

The vulnerability assessment will encompass the following key areas:

- **Infrastructure Assessment:**
Evaluate the security configurations and controls of the ERP system infrastructure, including servers and other relevant components.
- **Application Assessment:**
Review the security controls of ERP system applications, including modules for finance, human resources, procurement, IT Administration, and other functional areas.
- **Configuration Assessment:**
Assess the adequacy and effectiveness of security configurations for ERP system components, including database settings, user permissions, and access controls.
- **User Access Controls:**
Evaluate the processes and mechanisms for managing user access to the ERP system, including authentication methods, segregation of duty roles, role-based access controls, and privilege escalation mechanisms.
- **Documentation and Reporting:**
Document all findings, including identified vulnerabilities, their severity ratings, potential impact, and recommendations for remediation. Prepare a comprehensive report detailing the results of the assessment and presenting actionable insights and recommendations for improving the security posture of the ERP system.

5. DELIVERABLES

The following deliverables are expected as part of the vulnerability assessment:

- **Vulnerability Assessment Report:** A detailed report documenting the findings of the assessment, including identified vulnerabilities, their severity ratings, potential impact, and recommendations for remediation.
- **Executive Summary:** A concise summary of the assessment findings and recommendations tailored for senior municipal officials and decision-makers.
- **Remediation Plan:** A comprehensive plan outlining the steps for addressing identified vulnerabilities and implementing recommended security controls and measures.

6. SKILLS AND EXPERTISE.

The following skills and expertise are essential to effectively quote for an ERP vulnerability assessment:

- **Cybersecurity Knowledge:** Bidders must demonstrate a deep understanding of cybersecurity principles, including common vulnerabilities, threat vectors, and best practices for securing enterprise systems like ERP.
- **ERP Systems Proficiency:** Familiarity with various ERP systems and their architectures is crucial for accurately assessing vulnerabilities specific to these platforms. Bidders should possess knowledge of ERP modules, databases, integrations, and customization capabilities.
- **Risk Assessment Abilities:** Bidders must be capable of assessing and prioritizing risks based on their severity and potential impact on business operations. This includes conducting risk assessments tailored to ERP environments and identifying mitigation strategies.
- **Compliance Knowledge:** Understanding of relevant regulatory requirements and compliance frameworks (such as but not limited to POPIA, PCI DSS, and ISO/IEC

27001) applicable to ERP systems is necessary. Bidders should ensure that the assessment aligns with these standards.

- Documentation and Reporting Skills: Bidders should possess strong documentation and reporting skills to document assessment findings clearly and concisely. They should be able to prepare comprehensive reports detailing identified vulnerabilities, severity ratings, and recommended remediation actions.

7. SPECIAL CONDITIONS.

- The assessment must not impede the functionality or operational efficiency of the ERP system when executed.
- Vulnerability assessment tools such as automated software vulnerability scanners should not be executed during production time.

TECHNICAL EVALUATION CRITERIA

The below mentioned criteria regarding functionality is required for responsiveness and therefore eligibility for the next stage of evaluation. This is done to determine the ability of each bidder to successfully execute the project according to specifications. Failure to score minimum of **15 out of 20** points will lead to non-responsiveness.

These criteria shall only determine whether a bidder will further be evaluated and will not influence the points scored on Price. If any criterion is rated zero points, the bidder will be rejected, even if the required **15** out of **20** points are achieved.

For purposes of comparison and in order to ensure meaningful evaluation, bidders are requested to furnish detailed information in substantiation of compliance to functionality criteria mentioned and shall only determine whether a bid will further be evaluated.
